

University of Al-Qadisyiah  
College of Biotechnology  
Dept. of Agriculture Biotechnology  
Date: / /2017

Examination: Histology  
Time: Two  
Stage: first year

Final semester examination of first semester 2016-2017

**Note: Answer Four questions .**

**Q 1 / choice correct answer: (10Marks)**

1- what type of tissue lines the bladder?

- a) simple squamous Epi.
- b) simple cuboidal Epi.
- c) simple columnar Epi.
- d) transitional Epi.

2- What type of gland secretes its product through a duct or tube?

- a) endocrine gland
- b) multicellular gland
- c) exocrine gland
- d) all of the above

3- what form the brush border?

- a) micro villi
- b) stereocilia
- c) keratinization
- d) cilia

4- In which of these tissue are lamellae and trabeculae found?

- a) areolar connective tissue
- b) bone
- c) skeletal muscle
- d) cartilage

5- In nerve cells, the ..... contains the nucleus and is the site of general cell functions.

- a) axon
- b) cell body
- c) dendrite
- d) neuroglia

6- A tissue with collagen fibers and chondrocytes is

- a) adipose
- b) blood
- c) bone
- d) cartilage

7- Keratinized stratified squamous epithelium is found in the

- a) lining of the mouth
- b) lining of the urinary bladder
- c) lining of the small intestine
- d) skin

8- Mammary gland is

- a) simple tubular
- b) compound tubular
- c) compound acinar
- d) simple acinar

9) Dense irregular collagenous connective tissue found in

- a) wall of large arteries
- b) tendon
- c) dermis
- d) reticular tissue
